

AERÉ MARINE

A Performance Inflatables Company

BEACH ROLLER QUICK-START GUIDE

Simple steps for moving a dinghy over sand, mud, or rocks.

1 INFLATE THE ROLLER

Inflate until firm using your AERÉ 18V inflator.

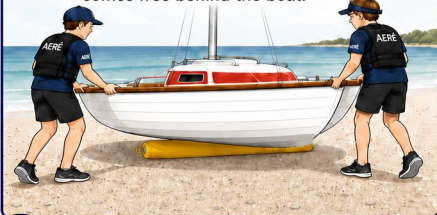

2 POSITION UNDER THE HULL

Set the roller perpendicular to the direction of travel.

3 ROLL FORWARD IN STAGES

Reposition the roller as it comes free behind the boat.

4 DEFLATE AND STOW

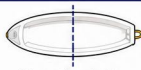

Deflate, place in a bin or tote, and store with minimal space.

QUICK TIPS

Clear sharp debris first.

Keep the hull centered on the roller.

Use extra care on uneven rocks or tidal flats.

AERÉ Inflatable Beach Roller
9" x 60" • 2,000 lb capacity
